

Things Around Us:

How plants are different from animals?

Plants Animals

Most plants make their Own food. Animals cannot make their own food.

2. Plants do not have sense Organs. Animals have sense organs

3. Animals move from one Place to another. Plants are usually fixed to The ground.

How can you say living things feel and react?

When we touch an ice cube our fingers feel cold. When we hear music our feet start tapping the floor. Our pet dog barks at strangers but wags its tail on seeing a family member. This shows living things feel and react.
